Adobe Photoshop

Marvelous Designer

Autodesk 3ds Max

Adobe Illustrator

To Whom It May Concern,

Brad Scheer was employed at the James Trogolo Company from March – October of 2018.

I served as his immediate supervisor and can attest to his strong work ethic and the dedication he has toward producing quality work.

As an outstanding member of our team, Brad made positive contributions in our design meetings, was excellent when it came to problem solving and enhanced our relationships with our clients through his excellent verbal and written communications.

The more I worked collaboratively with Brad, the more impressed I was with him. His depth of knowledge, when it comes to numerous design programs and ability to work efficiently and effectively was evident.

As Brad was often left alone to work independently, he showcased excellent time management skills and on most occasions, completed tasks way ahead of deadlines.

It is without hesitation that I would recommend Brad to any employer who is seeking a creative, hard-working, passionate, professional employee. As he continues to gain experience in the industry, I have no doubt that he will become a leader others will gladly follow and will serve as an asset to any team lucky enough to get to work with him. Our loss will be their gain.

Please don't hesitate to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Kevin Smith", with a long horizontal flourish extending to the right.

Subject: Letter of Employment Verification and Recommendation for Brad Scheer.

To Whom It May Concern,

Brad Scheer was employed as a Computer Lab Tech at Columbia College Chicago during the spring of 2017.

I was his immediate supervisor and I can attest to his great value to our department.

Mr. Scheer is articulate and able to express himself readily and effectively. More importantly, he is a proficient technologist conversant in the many facets of computer hardware and software deployed by the Interactive Arts and Media Department of Columbia College Chicago.

At one time or another, nearly every Columbia student will find himself or herself using our computer labs. Often, the student is working under the pressure of an approaching deadline and is easily frustrated by quirky equipment. It is in these encounters where Brad's patience shines. He has seen the many faces of Columbia College and has helped each in turn with the demons of technology.

Brad Scheer brings several strengths to any team he joins:

Patience

Compassion

Competence

Judicious understanding for the difficulties of others

An energy and positive attitude that lifts the spirits of those around him

Please contact me at 312-369-7171 if I can be of any additional service.

Sincerely,

Mark Quilhot
Facilities Manager
Interactive Arts and Media Department
Columbia College Chicago
916 S Wabash, Suite 101
Chicago, IL 60605

Dear Company of Interest,

I wish to recommend Brad Scheer for your current position

Working together in our senior-level Animation Portfolio Development class, I was much taken by Brad's work and his 'can-do' attitude. Polite, efficient and time sensitive, Brad worked diligently in creating and revising his work throughout the semester.

What impressed me most about Brad's work was his complex model work and his understanding that texture and lighting are essential elements to bring his work to life. He's got strong Maya skills and it's obvious that he pays attention to his work - but it's his continued quest for educating himself and bringing that knowledge to his models that will make him a strong hire for you to consider.

Please feel free to contact me regarding this endorsement or if you need further information.

Best Regards,

Julian Grant

Visual Effects & Motion Graphics Coordinator
